Farmacy Herbs Scholarship Application

We are committed to diversity and accessibility within our herbal programs. We aim to make our programs as accessible as possible to everyone. We offer scholarships, in some cases because the student can't afford it, but in other cases because we want to support any demographics that have been historically marginalized, oppressed or denied access to education, health care and herbalism. We have a large number of applicants for scholarships, and are only able to open up applications for a short period of time.
